

In the name of God
Summary of the scientific-research certificate of the faculty
members and researchers
Endocrinology and Metabolism Research Institute
Shahid Beheshti University of Medical Sciences

Name: Mahsa	Scopus ID number: 55822842100
Family name: Noroozzadeh	
H-Index: Scopus: 15 (May 2026) Google scholar: 17 (May 2026)	Total number of citations to articles: Scopus: 842 Google scholar: 1269 Number of citations to articles in 2025: Scopus: 121 Google scholar: 190
Total number of research projects: 66 Number of research projects in the role of executor: 37	Total number of articles: 71 Number of articles by the first author/responsible: 26 Number of articles in 2025: 5

In the name of God
Summary of the scientific-research certificate of the faculty
members and researchers
Endocrinology and Metabolism Research Institute
Shahid Beheshti University of Medical Sciences

1. Personal Information

Name: Mahsa	Date of birth:	National Code:
Last name: Noroozzadeh		
Identity Card No:	Place of Birth:	Father Name: Rahim
Emails: noroozzadeh@endocrine.ac.ir mahsanoroozzadeh@gmail.com mahsa_asal82@yahoo.com	Mobile phone no:	

2. Academic records / training courses

Grade	Education / orientation	Duration of study		University name	Country / city of study	GPA
		Start	End			
Bachelor's degree	Biology	2002	2006			
M.Sc.	Developmental Biology (Embryology)	2007	2010			

3. Employment Status

Faculty members and formal researchers: Formal researcher			
Contract researchers			
Work start date	contract type	Researcher rank	Last upgrade date
2010		Advanced	2020

4. Research Activities:

Publications:

Full Articles

Research projects:

1. Studying the trends of cardiometabolic factors in women with polycystic ovary syndrome during 20 years: Tehran Lipid and Glucose Study (TLGS).
2. Investigating the risk of metabolic, hormonal and fertility disorders in fathers and brothers of women with polycystic ovary syndrome: a systematic review and meta-analysis.
3. Examination of the metabolic disorders in children of women with early menopause: Tehran Lipid and Glucose Study.
4. Investigating the relationship between diabetes, dyslipidemia and obesity with prevalence of endometriosis: Tehran lipid and glucose study.
5. Examination of the effects of prenatal androgen excess exposure on oocyte quality and embryo quality and ovarian GDF9 gene expression in adult female rats.
6. Assessment of bone mass in a rat model of polycystic ovary syndrome.
7. GABA dysfunction and its consequences in women with polycystic ovary syndrome: a systematic review.
8. Investigating metabolic disorders in sons of women with polycystic ovary syndrome: Tehran Lipid and Glucose study.
9. Alzheimer and its underlying factors in patients with polycystic ovary syndrome: a narrative review.
10. Pharmacological approaches in the management of late hypogonadism, erectile dysfunction, and premature ejaculation in men: A narrative review.
11. Comparative study of pregnancy complications (mother-newborn) in one-step and two-step screening methods for gestational diabetes: Secondary analysis of data collected in the national gestational diabetes study.
12. Investigating the effect of gamma-aminobutyric acid (GABA) supplementation and the GABAergic pathway on the improvement of PCOS and Alzheimer's disease: a systematic review.

13. Relationship between weight changes with hypertension risk among postmenopausal women: Tehran Lipid and Glucose Study.
14. Prenatal androgen exposure and the risk of metabolic syndrome in women: Tehran Lipid and Glucose Study (TLGS).
15. Examination of cardiovascular risk factors in men participating in Tehran Lipid and Glucose Study (TLGS) with maternal hyperandrogenemia history.
16. Assessment of reproductive health indexes in TLGS.
17. Examination of cardiovascular risk factors in women participating in Tehran Lipid and Glucose Study (TLGS) with history of maternal clinical hyperandrogenism.
18. Evaluation of the prevalence of polycystic ovary morphology using ultasonography among reproductive age women participating in Tehran Lipid and Glucose Study.
19. The effects of prenatal androgen exposure on sexual function in women with polycystic ovary syndrome.
20. Sexual function and hormonal profiles in women with and without polycystic ovary syndrome: A population-based study.
21. Investigation of Cardiometabolic Profile Among Women with Idiopathic Hirsutism Over the Time: Tehran Lipid and Glucose Study (TLGS).
22. Effects of *Rosa damascena* extract on the clinical characteristics of mouse model of polycystic ovary syndrome.
23. Effect of *Rosa damascena* extracts on biochemical and histological parameters and gene expression of IGF-1 in Wistar rats model of polycystic ovary syndrome.
24. Inducing premature ovarian insufficiency experimental model through in utero exposure to galactose and comparison of the reproductive, metabolic, and immunological characteristics of female first-generation rats with controls.
25. Comparison of LH receptor gene expression profiling in the ovaries of normal and PCOS model rats.
26. Examination of cardiac function and tolerance to ischemia-reperfusion injury in a menopause rat model of polycystic ovary syndrome.
27. The comparison of myocardial ischemia-reperfusion injury in prenatally androgenized male and female rats compared to controls in adulthood.
28. Study and comparison of FSH-R and Activin-R genes expression profiling in the ovaries of normal and PCOS model rats.
29. Comparison of two models of surgically-induced (peritoneal and ovarian) endometriosis in NMRI mice.

30. Study and comparison of Aromatase gene expression profiling in the ovaries of normal and PCOS model rats.
31. Examination of appearance of breast tumor in a rat model of polycystic ovary syndrome.
32. The examination of myometrium contraction in rats with polycystic ovary syndrome compared to controls.
33. Study of Kisspeptin antagonist effect on gonadotropin-releasing hormone (GnRH1) gene expression in hypothalamus of rats with polycystic ovary syndrome.
34. Study and comparison of CYP17A and FST genes expression in theca cells of normal and PCOS model rats.
35. The examination of metabolic disorders in rats with polycystic ovary syndrome compared to control rats.
36. The effect of prenatal testosterone exposure on reproductive system performance in male rats after puberty.
37. Does the time of prenatal androgen exposure affect development of polycystic ovary syndrome-like phenotype in adulthood in female rats?
38. Introducing a rat model of prenatally androgen-induced polycystic ovary syndrome in adulthood.
39. Study of Anti-Müllerian hormone, Adiponectin and their receptors gene expression by granulosa cells in a rat model of polycystic ovary syndrome.
40. The effect of maternal hypothyroidism on hemodynamic parameters of the adult offspring in male rats.
41. Bone metabolism in polycystic ovary syndrome: A narrative review.
42. Alzheimer and its underlying factors in patients with polycystic ovary syndrome: a narrative review.
43. Ovarian aging and metabolic disturbances: review study.
44. A narrative review on challenges in diagnosis and treatment of polycystic ovary syndrome in adolescents.
45. Ovarian Changes in induced premature ovarian failure animal models by Chemotherapy agents: A Systematic Review.
46. The relationship between Migraine Headache and Symptoms and Complications of Polycystic Ovary Syndrome: A Narrative Review.
47. The risk of metabolic syndrome in polycystic ovary syndrome: A systematic review and meta-analysis.
48. Rat models of polycystic ovary syndrome (Review).

49. To determine the insulin resistance and metabolic syndrome in women with polycystic ovary syndrome compared with women with polycystic ovary syndrome: a systematic review and meta-analysis.

Congress:

1. **Noroozzadeh M**, Changaei M, Farhadi-Azar M, Ramezani Tehrani F. Prenatal androgen exposure increases the expression of genes involved in osteoporosis in middle-aged female rats. 15th International Congress of Endocrine Disorders, Tehran, Iran. Presentation: Poster
2. **Noroozzadeh M**, Farahmand M, Farhadi-Azar M, Saei Ghare Naz M, Ramezani Tehrani F. Metabolic profile in daughters of women with polycystic ovary syndrome: a long-term population-based study. 25th Royan International Twin Congress, Tehran, Iran. Presentation: Poster
3. **Noroozzadeh M**, Rahmati M, Ramezani Tehrani F. A higher risk of type 2 diabetes mellitus and overweight in female offspring of women with androgen excess during their pregnancy period: A long-term population-based follow-up study. 14th International Congress of Endocrine Disorders, Tehran, Iran. Presentation: Poster
4. **Noroozzadeh M**, Behboudi-Gandevani S, Farahmand M, Rostami Dovom M, Ramezani Tehrani F. Prenatal androgen exposure leads to occurrence of benign mammary tumors in female rats in later life. 12th International Congress of Endocrine Disorders, Tehran, Iran. Presentation: Poster
5. **Noroozzadeh M**, Faragi Shahrivar F, Raoufi MR, Ramezani Tehrani F. The effect of prenatal exposure to a single dose of testosterone on cardiac function in male and female rats in adulthood. International Congress of Gynecology & Endocrinology. Italy. Presentation: Oral
6. **Noroozzadeh M**, Ramezani Tehrani F. Correlations between Female Sexual Function Index and androgen levels in women with polycystic ovary syndrome and healthy women. 10th International Congress of Endocrine Disorders, Tehran, Iran. Presentation: Oral
7. **Noroozzadeh M**, Farhadi Azar M, Ramezani Tehrani F. Cardiac tolerance to ischemia/reperfusion injury in a rat model of polycystic ovary syndrome. 13th International Congress of Endocrine Disorders, Tehran, Iran. Presentation: Poster
8. **Noroozzadeh M**, Ramezani Tehrani F, Zahediasl S, Piryaee A. The effects of prenatal androgen exposure on sperm quality in male rats in adulthood. 5th Yazd International Congress and Student Award in Reproductive Medicine, Yazd, Iran. Presentation: Poster
9. **Noroozzadeh M**, Ramezani Tehrani F. The effects of in utero androgen exposure on sexual function in women with PCOS. The 17th International Congress of Endocrinology Held in Conjunction With The 15th Annual Meeting of Chinese Society of Endocrinology, Beijing, China. Presentation: Poster
10. **Noroozzadeh M**, Ramezani Tehrani F. The effect of prenatal androgen excess on morphological disorders of reproductive system in female rats. A morphological study. 19th International Iranian Congress Physiology and Pharmacology. Presentation: Poster

11. **Noroozzadeh M**, Ramezani Tehrani F. The comparison of the effect of two different doses of testosterone on development of polycystic ovary syndrome-like phenotype in female rat's offspring in adulthood. The 10th International Congress of Endocrine Disorders. Presentation: Poster.
12. **Noroozzadeh M**, Ramezani Tehrani F, Sedigh Mobarakabadi S, Farahmand M, Rostami Dovom M. Comparison of the effects of androgen on sexual function in women with and without polycystic ovary syndrome (PCOS). The 2nd International Congress on Reproduction, Yazd, Iran. Presentation: Poster
13. **Noroozzadeh M**, Behboudi-Gandevani S, Farahmand M, Rostami Dovom M, Ramezani Tehrani F. Comparison of pre and postnatal rat model of polycystic ovary syndrome. International Congress on Reproductive Biomedicine, Yazd, Iran. Presentation: Poster
14. **Noroozzadeh M**, Rahmati M, Ramezani Tehrani F. Prenatal androgen exposure and overweight in female offspring in later life. Tehran lipid and glucose study. 8th national obesity congress, Tehran, Iran. Presentation: Poster
15. **Noroozzadeh M**, Ramezani Tehrani F, Zahediasl S, Piryaee A, Azizi F. Prenatal exposure to a single dose of testosterone leads to appearance of polycystic ovary syndrome in female rat's offspring in adulthood. The 6th Yazd International Congress and Student Award in Reproductive Medicine with 1st Reproductive Genetic Congress, Yazd, Iran. Presentation: Poster
16. Behboudi-Gandevani S, Ramezani Tehrani F, **Noroozzadeh M**, Rostami Dovom M, Farahmand M, Azizi F. Risk of metabolic syndrome in polycystic ovary syndrome: Tehran Lipid and Glucose Study. 10th International Congress of Endocrine Disorders, Tehran, Iran. Presentation: Oral
17. Nazarpour S, Teimoori L, **Noroozzadeh M**. Evaluation of cadmium concentration in Mother's milk. The 3rd International Congress on Biomedicine, Tehran, Iran. Presentation: Oral
18. Rostami Dovom M, **Noroozzadeh M**, Mosaffa N, Zadeh-Vakili A, Piryaee A, Ramezani Tehrani F. Ovarian histological profile by using D galactose induction for premature ovarian failure model in small laboratory animals: A systematic review. The 3rd International Congress on Biomedicine, Tehran, Iran. Presentation: Poster
19. Behboudi-gandevani S, Ramezani Tehrani F, **Noroozzadeh M**, Roatami Dovom M, Farahmand M, Azizi F. Risk of pre-hypertension and hypertension in polysystic ovary syndrom: Tehran Lipid and Glucose Study 10th International Congress of Endocrine Disorders, Tehran, Iran. Presentation: Oral
20. Behboudi- Gandevani S, Ramezani Tehrani F, **Noroozzadeh M**, Rostami Dovom M, Farahmand M, Amiri M, Azizi F. The risk of hypertension in polycystic ovary syndrome: long-term population-based cohort study. International Congress on Reproductive Biomedicine, Yazd, Iran. Presentation: Poster

Symposiums, Webinars and Workshop:

1. Mathematics in laboratory, Research Institute for Endocrine Molecular Biology, Research Institute for Endocrine Sciences, Shahid Beheshti University of Medical Sciences, Tehran, Iran (2025).
2. Polycystic ovary syndrome in adolescents and adults, Research Institute for Endocrine Sciences, Shahid Beheshti University of Medical Sciences, Tehran, Iran (2024).

3. Diabetes and nutrition (prevention and treatment), Research Institute for Endocrine Sciences, Shahid Beheshti University of Medical Sciences, Tehran, Iran (2024).
4. Hormone assay, Research Institute for Endocrine Sciences, Shahid Beheshti University of Medical Sciences, Tehran, Iran (2024).
5. Laboratory Quality Control Workshop, Research Institute for Endocrine Sciences, Shahid Beheshti University of Medical Sciences, Tehran, Iran (2019)
6. Principles of Working with Laboratory Animals, Experimental Medicine Research Center, Tehran University of Medical Sciences, Tehran, Iran (2018)
7. Hormone Therapy for Sexual Dysfunction, Research Institute for Endocrine Sciences, Shahid Beheshti University of Medical Sciences, Tehran, Iran. (2015)
8. Application of Laboratory Animals in Embryology Research, Royan Institute, Tehran, Iran (2014)
9. Polycystic Ovary Syndrome, Research Institute for Endocrine Sciences, Shahid Beheshti University of Medical Sciences, Tehran, Iran. (2014)
10. Treatment of Menstrual Cycle Disorders, Research Institute for Endocrine Sciences, Shahid Beheshti University of Medical Sciences, Tehran, Iran. (2012)
11. Medical Paper Writing Workshop, Research Institute for Endocrine Sciences, Shahid Beheshti University of Medical Sciences, Tehran, Iran (2012)
12. Preliminary Research Method Workshop, Research Institute for Endocrine Sciences, Shahid Beheshti University of Medical Sciences, Tehran, Iran (2011)
13. Research Methods Workshop, Research Institute for Endocrine Sciences, Shahid Beheshti University of Medical Sciences, Tehran, Iran (2011)
14. Scientific writing Workshop, Research Institute for Endocrine Sciences, Shahid Beheshti University of Medical Sciences, Tehran, Iran (2011)
15. Scientific Presentation Workshop, Research Institute for Endocrine Sciences, Shahid Beheshti University of Medical Sciences, Tehran, Iran (2010)

Grant support

1. 2025 Shahid Beheshti University of Medical Sciences, Tehran, Iran (PIs: Ramezani Tehrani F, and **Noroozzadeh M**) “Examination of the metabolic disorders in children of women with early menopause: Tehran Lipid and Glucose Study”
2. 2025 Shahid Beheshti University of Medical Sciences, Tehran, Iran (PIs: Ramezani Tehrani F, and **Noroozzadeh M**) “Studying the trends of cardiometabolic factors in women with polycystic ovary syndrome during 20 years: Tehran Lipid and Glucose Study (TLGS) ”

3. 2024 Shahid Beheshti University of Medical Sciences, Tehran, Iran (PIs: Ramezani Tehrani F, and **Noroozzadeh M**) “Examination of the effects of prenatal androgen excess exposure on oocyte quality and embryo quality and ovarian GDF9 gene expression in adult female rats”
4. 2024 Shahid Beheshti University of Medical Sciences, Tehran, Iran (PIs: Ramezani Tehrani F, and **Noroozzadeh M**) “Investigating metabolic disorders in sons of women with polycystic ovary syndrome: Tehran Lipid and Glucose study”
5. 2023 Shahid Beheshti University of Medical Sciences, Tehran, Iran (PIs: Ramezani Tehrani F, and **Noroozzadeh M**) “Alzheimer and its underlying factors in patients with polycystic ovary syndrome: a narrative review”
6. 2023 Shahid Beheshti University of Medical Sciences, Tehran, Iran (PIs: Ramezani Tehrani F, and **Noroozzadeh M**) “Assessment of bone mass in polycystic ovary syndrome (PCOS) rats compared to controls”
7. 2023 NIMAD, Tehran, Iran (PIs: Ramezani Tehrani F, and **Noroozzadeh M**) “Assessment of bone mass in a rat model of polycystic ovary syndrome (PCOS)”
8. 2022 Shahid Beheshti University of Medical Sciences, Tehran, Iran (PIs: Ramezani Tehrani F, and **Noroozzadeh M**) “Examination of cardiovascular risk factors in women participating in Tehran Lipid and Glucose Study (TLGS) with history of maternal clinical hyperandrogenism”
9. 2022 Shahid Beheshti University of Medical Sciences, Tehran, Iran (PIs: **Noroozzadeh M**, and F Ramezani Tehrani, MD) “Comparison of LH receptor gene expression profiling in the ovaries of normal and PCOS model rats”
10. 2022 Shahid Beheshti University of Medical Sciences, Tehran, Iran (PIs: **Noroozzadeh M**, and F Ramezani Tehrani) “Study and comparison of FSHR and ActivinR genes expression profiling in the ovaries of normal and PCOS model rats”
11. 2022 Shahid Beheshti University of Medical Sciences, Tehran, Iran (PIs: **Noroozzadeh M**, and F Ramezani Tehrani) “Study and comparison of Aromatase gene expression profiling in the ovaries of normal and PCOS model rats”
12. 2021 Shahid Beheshti University of Medical Sciences, Tehran, Iran (PIs: Ramezani Tehrani F, and **Noroozzadeh M**) “Examination of cardiac function and tolerance to ischemia-reperfusion injury in a menopause rat model of polycystic ovary syndrome”
13. 2018 Young Researcher Grant. International Congress of Gynecology & Endocrinology. Florence, Italy
14. 2017 Shahid Beheshti University of Medical Sciences, Tehran, Iran (PIs: Ramezani Tehrani F and **Noroozzadeh M**) “Examination of breast tumors in a rat model of polycystic ovary syndrome”
15. 2017 Shahid Beheshti University of Medical Sciences, Tehran, Iran (PIs: Ramezani Tehrani F and **Noroozzadeh M**) “Hormone-induced rat model of polycystic ovary syndrome”

5. Executive records (responsibilities):

No.	Title of responsibility	Organization / Institute	Year
1	Researcher and Laboratory expert	Research Institute for Endocrine Molecular Biology, Research Institute for Endocrine Sciences, Shahid Beheshti University of Medical Sciences, Tehran, Iran	2010 until now (2026)

6. Academic Awards:

1. Top Researcher. Research Institute for Endocrine Sciences, Shahid Beheshti University of Medical Sciences, Tehran, Iran (2019)
2. Top Researcher. Research Institute for Endocrine Sciences, Shahid Beheshti University of Medical Sciences, Tehran, Iran (2018)
3. Top Researcher. International Congress of Gynecology & Endocrinology. Florence, Italy (2018)
4. Top student in Bachelor's degree
5. Top student in Master's degree

7. Membership in scientific forums and associations:

Embryology forum (Iran)

8. Skills (mastering foreign languages, software or device, ...) (with full specifications):

1. Writing scientific-medical articles
2. Mastery of English language
3. Mastery of WORD and Excel software
4. Mastery of SPSS and PRISM software
5. Mastery of searching in reliable scientific databases
6. Working with the Langendorf device (isolated heart)
7. Working with a tissue microtome
8. Mastering the preparation of tissue sections for microscopic examination (histopathology)
9. Examination of rat ovarian tissue and ovarian follicles under light microscope
10. Animal (rat) modeling of polycystic ovary syndrome

11. Animal (rat) modeling of premature ovarian menopause
12. Working with a laboratory animal (rat) (surgery, intraperitoneal injection, subcutaneous injection, blood sampling)
13. Performing insulin tolerance test in rats
14. Performing glucose tolerance test by intraperitoneal and intravenous methods in rats
15. Isolation of bones in rats
16. Performing a behavioral test (water maze) in rats
17. Isolation of brain and hippocampus in rats
18. Hormone measurement by ELISA method
19. Determining sexual cycle phases in rats
20. Set up histology
21. Set up Langendorf system (isolated heart)
22. Real-time PCR
